## Methods

### Theoretical

*Classical mechanics*

$O_2H$ isomerization: potential energy surface topography and classical dynamical study, C. Zuhrt, L. Zülicke and X. Chapuisat 166 (1992) 1

*Coupling schemes and perturbative treatments*

Vibronic coupling in trimers. Statics: the effects of second-order vibronic coupling, M.J. Riley, H.U. Güdel and A.H. Norton 166 (1992) 19

*Transport quantum mechanics*

Theory of geminate recombination of radical pairs with instantaneously changing spin Hamiltonian. III. Radical recombination in switched high magnetic field, S.A. Mikhailov, P.A. Purtov and A.B. Doktorov 166 (1992) 35
Inertial and inertialess vibrational modes in charge transfer: a simple model, A.M. Kuznetsov 166 (1992) 303

*Equilibrium statistical mechanics*

Model study of the primary H/D isotope effects on the NMR chemical shift in strong hydrogen-bonded systems, M.V. Vener 166 (1992) 311

*Non-equilibrium thermodynamic and hydrodynamic theories*

The stability of static chemical spike structures in reaction–diffusion systems, R.F. Sultan 166 (1992) 51
The dynamics of hot F atoms in low pressure plasma etching reactors, B. Shizgal and A.S. Clarke 166 (1992) 317

*Ab initio schemes for stationary properties*

A theoretical investigation on the structure of the hypervalent carbon and silicon pentahalogenides as well as their singly charged anions, G.L. Gutsev 166 (1992) 57
A combined experimental and theoretical investigation of $C_2H_2^{2+}$ electronic-state energies, S.R. Andrews, F.M. Harris and D.E. Parry 166 (1992) 69
Accurate calculation of the electron affinities of the group-13 atoms, F. Arnau, F. Mota and J.J. Novoa 166 (1992) 77
The proton position in amine–HX (X=Br, I) complexes, Z. Latajka, S. Scheiner and H. Ratajczak 166 (1992) 85
Many-body symmetry-adapted perturbation theory study of the $He\cdots F^-$ interaction, R. Moszynski, B. Jeziorski and K. Szalewicz 166 (1992) 329

Intermolecular potential function for methanol dimer interactions from ab initio calculations, E.H.S. Anwander, M.M. Probst and B.M. Rode 166 (1992) 341
MRSDCI studies of four low-lying electronic states of the $OF_2^+$ion, Z.-L. Cai and H.-M. Xiao 166 (1992) 361

*Computational and simulation methods*
A theoretical investigation on the structure of the hypervalent carbon and silicon pentahalogenides as well as their singly charged anions, G.L. Gutsev 166 (1992) 57
Electron transfer optical bands of charge-ordered mixed valence compounds. Quasidynamical model, B.S. Tsukerblat, S.I. Klokishner and B.L. Kushkuley 166 (1992) 97
Franck–Condon transition component distributions in chemical bond formation processes in condensed systems, C. Engler and W. Lorenz 166 (1992) 107
Many-body symmetry-adapted perturbation theory study of the $He\cdots F^-$ interaction, R. Moszynski, B. Jeziorski and K. Szalewicz 166 (1992) 329
Intermolecular potential function for methanol dimer interactions from ab initio calculations, E.H.S. Anwander, M.M. Probst and B.M. Rode 166 (1992) 341

*Molecular dynamics and scattering theory*
$O_2H$ isomerization: potential energy surface topography and classical dynamical study, C. Zuhrt, L. Zülicke and X. Chapuisat 166 (1992) 1
Classical transition state theory for the ion-linear quadrupole capture, J. Turulski, B. Pezler and J. Niedzielski 166 (1992) 115
Quantum transition state theory of the capture of an ion by a linear quadrupole in the state of low rotational excitation, B. Pezler, J. Turulski and J. Niedzielski 166 (1992) 123
A molecular dynamics study of amorphous selenium , S. Balasubramanian, K.V. Damodaran and K.J. Rao 166 (1992) 131

**Experimental**

*Magnetic resonances*
Electron transfer in tetranuclear mixed-valence iron clusters. Role of the topology on the magnetic properties, J.J. Borras-Almenar, E. Coronado, R. Georges and C.J. Gomez-Garcia 166 (1992) 139
Computer-simulation of the multiple-quantum dynamics of one-, two- and three-dimensional spin distributions, B.E. Scruggs and K.K. Gleason 166 (1992) 367

*Infrared spectroscopy*
Electron transfer optical bands of charge-ordered mixed valence compounds. Quasidynamical model, B.S. Tsukerblat, S.I. Klokishner and B.L. Kushkuley 166 (1992) 97
Spectroscopy of $HD^+$ in high angular momentum states, A. Carrington, C.A. Leach, A.J. Marr, R.E. Moss, C.H. Pyne, M.R. Viant, Y.D. West, R.A. Kennedy and I.R. McNab 166 (1992) 145
Infrared photoconversion between two forms of the $CH_3OH$:HI one-to-one complex trapped in a nitrogen matrix, N. Bakkas, A. Loutellier, S. Racine and J.P. Perchard 166 (1992) 167

*Raman spectroscopy*
The origin of extra resonances in saturated, fully resonant, molecular spectroscopies, R.J. Carlson 166 (1992) 177

*Visible and UV spectroscopy*

Electron transfer optical bands of charge-ordered mixed valence compounds. Quasidynamical model, B.S. Tsukerblat, S.I. Klokishner and B.L. Kushkuley 166 (1992) 97

High pressure effect on the twisted intramolecular charge transfer fluorescence and absorption of *p*-N,N-dimethylaminobenzylidenemalononitrile (DMABMN) in polymeric matrices, Z.A. Dreger, J.M. Lang and H.G. Drickamer 166 (1992) 193

Autodetachment spectroscopy of vibrationally excited acetaldehyde enolate anion, $CH_2CHO^-$, A.S. Mullin, K.K. Murray, C.P. Schulz, D.M. Szaflarski and W.C. Lineberger 166 (1992) 207

Three laws for $D_0$ (BiF), R.K. Yoo, B. Ruscic and J. Berkowitz 166 (1992) 215

A study of the $S_2$ ($X\ ^3\Sigma_g^-$) molecule by multiphoton ionization spectroscopy, M. Barnes, J. Baker, J.M. Dyke and R. Richter 166 (1992) 229

High pressure study of phase transitions and intermolecular interaction in crystalline benzene, S.I. Gaidai and K.P. Meletov 166 (1992) 241

A study of the absolute photoabsorption cross section and the photoionization quantum efficiency of nitrogen from the ionization threshold to 485 Å, D.A. Shaw, D.M.P. Holland, M.A. MacDonald, A. Hopkirk, M.A. Hayes and S.M. McSweeney 166 (1992) 379

Spin–orbit splitting and Jahn–Teller effect in rare gas matrix-isolated Ag and Au atoms: a magnetic circular dichroism study, D. Roser, R. Pellow, M. Eyring, M. Vala, J. Lignieres and J.C. Rivoal 166 (1992) 393

*Fluorescence spectroscopy*

High pressure effect on the twisted intramolecular charge transfer fluorescence and absorption of *p*-N,N-dimethylaminobenzylidenemalononitrile (DMABMN) in polymeric matrices, Z.A. Dreger, J.M. Lang and H.G. Drickamer 166 (1992) 193

One-step parameter estimation of the acid–base equilibria in the ground and excited states of 2-naphthol by global compartmental analysis of the fluorescence decay surface, V. Van den Bergh, N. Boens, F.C. De Schryver, M. Ameloot, J. Gallay and A. Kowalczyk 166 (1992) 249

Electrochemical generation of excited TICT states. V. Evidence of inverted Marcus region, A. Kapturkiewicz 166 (1992) 259

*X-ray spectroscopy*

Electronic properties of the $SF_5Cl$ molecule: a comparison with $SF_6$. I. Photoabsorption spectra near the sulphur K and chlorine K edges, C. Reynaud, S. Bodeur, J.L. Maréchal, D. Bazin, P. Millié, I. Nenner, U. Rockland and H. Baumgärtel 166 (1992) 411

*Laser methods*

Spectroscopy of $HD^+$ in high angular momentum states, A. Carrington, C.A. Leach, A.J. Marr, R.E. Moss, C.H. Pyne, M.R. Viant, Y.D. West, R.A. Kennedy and I.R. McNab 166 (1992) 145

The origin of extra resonances in saturated, fully resonant, molecular spectroscopies, R.J. Carlson 166 (1992) 177

Autodetachment spectroscopy of vibrationally excited acetaldehyde enolate anion, $CH_2CHO^-$, A.S. Mullin, K.K. Murray, C.P. Schulz, D.M. Szaflarski and W.C. Lineberger 166 (1992) 207

Time-dependent study of the dynamics of the collision-induced intramultiplet mixing of $Ca(4s4p(^3P_J))$ by helium at 750 K following pulsed dye-laser generation of $Ca(4s4p(^3P_1))$, F. Beitia, F. Castaño, M.N. Sanchez Rayo and D. Husain 166 (1992) 275

*Non-linear optical spectroscopy*
The origin of extra resonances in saturated, fully resonant, molecular spectroscopies, R.J. Carlson 166 (1992) 177

*Synchrotron spectroscopies*
A study of the absolute photoabsorption cross section and the photoionization quantum efficiency of nitrogen from the ionization threshold to 485 Å, D.A. Shaw, D.M.P. Holland, M.A. MacDonald, A. Hopkirk, M.A. Hayes and S.M. McSweeney 166 (1992) 379
Electronic properties of the $SF_5Cl$ molecule: a comparison with $SF_6$. I. Photoabsorption spectra near the sulphur K and chlorine K edges, C. Reynaud, S. Bodeur, J.L. Maréchal, D. Bazin, P. Millié, I. Nenner, U. Rockland and H. Baumgärtel 166 (1992) 411

*Multiple resonance spectroscopy*
The origin of extra resonances in saturated, fully resonant, molecular spectroscopies, R.J. Carlson 166 (1992) 177

*Atomic and molecular beam techniques*
Spectroscopy of $HD^+$ in high angular momentum states, A. Carrington, C.A. Leach, A.J. Marr, R.E. Moss, C.H. Pyne, M.R. Viant, Y.D. West, R.A. Kennedy and I.R. McNab 166 (1992) 145

*Time-resolved experiments*
Theory of geminate recombination of radical pairs with instantaneously changing spin Hamiltonian. III. Radical recombination in switched high magnetic field, S.A. Mikhailov, P.A. Purtov and A.B. Doktorov 166 (1992) 35
One-step parameter estimation of the acid–base equilibria in the ground and excited states of 2-naphthol by global compartmental analysis of the fluorescence decay surface, V. Van den Bergh, N. Boens, F.C. De Schryver, M. Ameloot, J. Gallay and A. Kowalczyk 166 (1992) 249
Time-dependent study of the dynamics of the collision-induced intramultiplet mixing of $Ca(4s4p(^3P_J))$ by helium at 750 K following pulsed dye-laser generation of $Ca(4s4p(^3P_1))$, F. Beitia, F. Castaño, M.N. Sanchez Rayo and D. Husain 166 (1992) 275

*Mass spectrometry*
A combined experimental and theoretical investigation of $C_2H_2^{2+}$ electronic-state energies, S.R. Andrews, F.M. Harris and D.E. Parry 166 (1992) 69

*X-ray, electron and neutron diffraction*
The structure of different phases of pure $C_{70}$ crystals, M.A. Verheijen, H. Meekes, G. Meijer, P. Bennema, J.L. De Boer, S. Van Smaalen, G. Van Tendeloo, S. Amelinckx, S. Muto and J. Van Landuyt 166 (1992) 287

*Neutron scattering*
Low frequency excitations of aromatic molecules in the solid state, J. Williams and B. Frick 166 (1992) 425

*Measurement of macroscopic variables*
Application of the Yukawa potential to the auto-controlled mechanism of the ovalbumin molecule in aqueous systems, T. Matsumoto and H. Inoue 166 (1992) 299

## Objects

### Bulk systems

*Gases*

A combined experimental and theoretical investigation of $C_2H_2^{2+}$ electronic-state energies, S.R. Andrews, F.M. Harris and D.E. Parry 166 (1992) 69
Classical transition state theory for the ion-linear quadrupole capture, J. Turulski, B. Pezler and J. Niedzielski 166 (1992) 115
Quantum transition state theory of the capture of an ion by a linear quadrupole in the state of low rotational excitation, B. Pezler, J. Turulski and J. Niedzielski 166 (1992) 123
The dynamics of hot F atoms in low pressure plasma etching reactors, B. Shizgal and A.S. Clarke 166 (1992) 317
MRSDCI studies of four low-lying electronic states of the $OF_2^+$ ion, Z.-L. Cai and H.-M. Xiao 166 (1992) 361

*Chrystals*

The structure of different phases of pure $C_{70}$ crystals, M.A. Verheijen, H. Meekes, G. Meijer, P. Bennema, J.L. De Boer, S. Van Smaalen, G. Van Tendeloo, S. Amelinckx, S. Muto and J. Van Landuyt 166 (1992) 287

*–mixed*

Electron transfer optical bands of charge-ordered mixed valence compounds. Quasidynamical model, B.S. Tsukerblat, S.I. Klokishner and B.L. Kushkuley 166 (1992) 97

*Glasses*

A molecular dynamics study of amorphous selenium , S. Balasubramanian, K.V. Damodaran and K.J. Rao 166 (1992) 131

*Liquid crystals*

Computer-simulation of the multiple-quantum dynamics of one-, two- and three-dimensional spin distributions, B.E. Scruggs and K.K. Gleason 166 (1992) 367

*Surfaces*

Franck–Condon transition component distributions in chemical bond formation processes in condensed systems, C. Engler and W. Lorenz 166 (1992) 107
Computer-simulation of the multiple-quantum dynamics of one-, two- and three-dimensional spin distributions, B.E. Scruggs and K.K. Gleason 166 (1992) 367

*Low-dimensional materials*

Computer-simulation of the multiple-quantum dynamics of one-, two- and three-dimensional spin distributions, B.E. Scruggs and K.K. Gleason 166 (1992) 367

*Biological systems*

The stability of static chemical spike structures in reaction–diffusion systems, R.F. Sultan 166 (1992) 51

Application of the Yukawa potential to the auto-controlled mechanism of the ovalbumin molecule in aqueous systems, T. Matsumoto and H. Inoue 166 (1992) 299

**Microscopic systems**

*Atoms*

Accurate calculation of the electron affinities of the group-13 atoms, F. Arnau, F. Mota and J.J. Novoa 166 (1992) 77
Time-dependent study of the dynamics of the collision-induced intramultiplet mixing of Ca(4s4p($^3P_J$)) by helium at 750 K following pulsed dye-laser generation of Ca(4s4p($^3P_1$)), F. Beitia, F. Castaño, M.N. Sanchez Rayo and D. Husain 166 (1992) 275
Spin–orbit splitting and Jahn–Teller effect in rare gas matrix-isolated Ag and Au atoms: a magnetic circular dichroism study, D. Roser, R. Pellow, M. Eyring, M. Vala, J. Lignieres and J.C. Rivoal 166 (1992) 393

*Molecules (neutral and ionic)*

A theoretical investigation on the structure of the hypervalent carbon and silicon pentahalogenides as well as their singly charged anions, G.L. Gutsev 166 (1992) 57
Classical transition state theory for the ion-linear quadrupole capture, J. Turulski, B. Pezler and J. Niedzielski 166 (1992) 115
Quantum transition state theory of the capture of an ion by a linear quadrupole in the state of low rotational excitation, B. Pezler, J. Turulski and J. Niedzielski 166 (1992) 123
MRSDCI studies of four low-lying electronic states of the $OF_2^+$ ion, Z.-L. Cai and H.-M. Xiao 166 (1992) 361

*–diatomic*

Spectroscopy of $HD^+$ in high angular momentum states, A. Carrington, C.A. Leach, A.J. Marr, R.E. Moss, C.H. Pyne, M.R. Viant, Y.D. West, R.A. Kennedy and I.R. McNab 166 (1992) 145
Three laws for $D_0$ (BiF), R.K. Yoo, B. Ruscic and J. Berkowitz 166 (1992) 215
A study of the $S_2$ ($X\ ^3\Sigma_g^-$) molecule by multiphoton ionization spectroscopy, M. Barnes, J. Baker, J.M. Dyke and R. Richter 166 (1992) 229
A study of the absolute photoabsorption cross section and the photoionization quantum efficiency of nitrogen from the ionization threshold to 485 Å, D.A. Shaw, D.M.P. Holland, M.A. MacDonald, A. Hopkirk, M.A. Hayes and S.M. McSweeney 166 (1992) 379

*–small polyatomics*

$O_2H$ isomerization: potential energy surface topography and classical dynamical study, C. Zuhrt, L. Zülicke and X. Chapuisat 166 (1992) 1
Vibronic coupling in trimers. Statics: the effects of second-order vibronic coupling, M.J. Riley, H.U. Güdel and A.H. Norton 166 (1992) 19
A molecular dynamics study of amorphous selenium , S. Balasubramanian, K.V. Damodaran and K.J. Rao 166 (1992) 131
Autodetachment spectroscopy of vibrationally excited acetaldehyde enolate anion, $CH_2CHO^-$, A.S. Mullin, K.K. Murray, C.P. Schulz, D.M. Szaflarski and W.C. Lineberger 166 (1992) 207
Electronic properties of the $SF_5Cl$ molecule: a comparison with $SF_6$. I. Photoabsorption spectra near the sulphur K and chlorine K edges, C. Reynaud, S. Bodeur, J.L. Maréchal, D. Bazin, P. Millié, I. Nenner, U. Rockland and H. Baumgärtel 166 (1992) 411

*–aromatics*

One-step parameter estimation of the acid–base equilibria in the ground and excited states of 2-naphthol by global compartmental analysis of the fluorescence decay surface, V. Van den Bergh, N. Boens, F.C. De Schryver, M. Ameloot, J. Gallay and A. Kowalczyk 166 (1992) 249
Electrochemical generation of excited TICT states. V. Evidence of inverted Marcus region, A. Kapturkiewicz 166 (1992) 259
Model study of the primary H/D isotope effects on the NMR chemical shift in strong hydrogen-bonded systems, M.V. Vener 166 (1992) 311
Low frequency excitations of aromatic molecules in the solid state, J. Williams and B. Frick 166 (1992) 425

*–polymeric and biological*

High pressure effect on the twisted intramolecular charge transfer fluorescence and absorption of *p*-N,N-dimethylaminobenzylidenemalononitrile (DMABMN) in polymeric matrices , Z.A. Dreger, J.M. Lang and H.G. Drickamer 166 (1992) 193
Application of the Yukawa potential to the auto-controlled mechanism of the ovalbumin molecule in aqueous systems, T. Matsumoto and H. Inoue 166 (1992) 299

*Molecular aggregates*
The structure of different phases of pure $C_{70}$ crystals, M.A. Verheijen, H. Meekes, G. Meijer, P. Bennema, J.L. De Boer, S. Van Smaalen, G. Van Tendeloo, S. Amelinckx, S. Muto and J. Van Landuyt 166 (1992) 287
Many-body symmetry-adapted perturbation theory study of the $He\cdots F^-$ interaction, R. Moszynski, B. Jeziorski and K. Szalewicz 166 (1992) 329

*–dimers*

The proton position in amine–HX (X=Br, I) complexes, Z. Latajka, S. Scheiner and H. Ratajczak 166 (1992) 85
Infrared photoconversion between two forms of the $CH_3OH$:HI one-to-one complex trapped in a nitrogen matrix, N. Bakkas, A. Loutellier, S. Racine and J.P. Perchard 166 (1992) 167
Model study of the primary H/D isotope effects on the NMR chemical shift in strong hydrogen-bonded systems, M.V. Vener 166 (1992) 311
Intermolecular potential function for methanol dimer interactions from ab initio calculations, E.H.S. Anwander, M.M. Probst and B.M. Rode 166 (1992) 341

*–van der Waals molecules*

Many-body symmetry-adapted perturbation theory study of the $He\cdots F^-$ interaction, R. Moszynski, B. Jeziorski and K. Szalewicz 166 (1992) 329

*Free radicals (including hydronium and muonium)*
Theory of geminate recombination of radical pairs with instantaneously changing spin Hamiltonian. III. Radical recombination in switched high magnetic field, S.A. Mikhailov, P.A. Purtov and A.B. Doktorov 166 (1992) 35

*Quasiparticles (including excitions)*
High pressure study of phase transitions and intermolecular interaction in crystalline benzene, S.I. Gaidai and K.P. Meletov 166 (1992) 241

*Ions and charge carriers*
A combined experimental and theoretical investigation of $C_2H_2^{2+}$ electronic-state energies, S.R. Andrews, F.M. Harris and D.E. Parry 166 (1992) 69
Accurate calculation of the electron affinities of the group-13 atoms, F. Arnau, F. Mota and J.J. Novoa 166 (1992) 77
Classical transition state theory for the ion-linear quadrupole capture, J. Turulski, B. Pezler and J. Niedzielski 166 (1992) 115
Quantum transition state theory of the capture of an ion by a linear quadrupole in the state of low rotational excitation, B. Pezler, J. Turulski and J. Niedzielski 166 (1992) 123
Inertial and inertialess vibrational modes in charge transfer: a simple model, A.M. Kuznetsov 166 (1992) 303

## Phenomena

*Molecular structure*
A theoretical investigation on the structure of the hypervalent carbon and silicon pentahalogenides as well as their singly charged anions, G.L. Gutsev 166 (1992) 57
MRSDCI studies of four low-lying electronic states of the $OF_2^+$ ion, Z.-L. Cai and H.-M. Xiao 166 (1992) 361

*Vibrations and rotations of molecules*
Vibronic coupling in trimers. Statics: the effects of second-order vibronic coupling, M.J. Riley, H.U. Güdel and A.H. Norton 166 (1992) 19
Spectroscopy of $HD^+$ in high angular momentum states, A. Carrington, C.A. Leach, A.J. Marr, R.E. Moss, C.H. Pyne, M.R. Viant, Y.D. West, R.A. Kennedy and I.R. McNab 166 (1992) 145
Autodetachment spectroscopy of vibrationally excited acetaldehyde enolate anion, $CH_2CHO^-$, A.S. Mullin, K.K. Murray, C.P. Schulz, D.M. Szaflarski and W.C. Lineberger 166 (1992) 207
A study of the $S_2$ ($X\ ^3\Sigma_g^-$) molecule by multiphoton ionization spectroscopy, M. Barnes, J. Baker, J.M. Dyke and R. Richter 166 (1992) 229

*Electronic structure and states*
A theoretical investigation on the structure of the hypervalent carbon and silicon pentahalogenides as well as their singly charged anions, G.L. Gutsev 166 (1992) 57
A combined experimental and theoretical investigation of $C_2H_2^{2+}$ electronic-state energies, S.R. Andrews, F.M. Harris and D.E. Parry 166 (1992) 69
Accurate calculation of the electron affinities of the group-13 atoms, F. Arnau, F. Mota and J.J. Novoa 166 (1992) 77
Electron transfer in tetranuclear mixed-valence iron clusters. Role of the topology on the magnetic properties, J.J. Borras-Almenar, E. Coronado, R. Georges and C.J. Gomez-Garcia 166 (1992) 139
A study of the $S_2$ ($X\ ^3\Sigma_g^-$) molecule by multiphoton ionization spectroscopy, M. Barnes, J. Baker, J.M. Dyke and R. Richter 166 (1992) 229
MRSDCI studies of four low-lying electronic states of the $OF_2^+$ ion, Z.-L. Cai and H.-M. Xiao 166 (1992) 361

Spin–orbit splitting and Jahn–Teller effect in rare gas matrix-isolated Ag and Au atoms: a magnetic circular dichroism study, D. Roser, R. Pellow, M. Eyring, M. Vala, J. Lignieres and J.C. Rivoal 166 (1992) 393
Electronic properties of the $SF_5Cl$ molecule: a comparison with $SF_6$. I. Photoabsorption spectra near the sulphur K and chlorine K edges, C. Reynaud, S. Bodeur, J.L. Maréchal, D. Bazin, P. Millié, I. Nenner, U. Rockland and H. Baumgärtel 166 (1992) 411

*Electric and magnetic properties*
Model study of the primary H/D isotope effects on the NMR chemical shift in strong hydrogen-bonded systems, M.V. Vener 166 (1992) 311

*Spin splittings*
Theory of geminate recombination of radical pairs with instantaneously changing spin Hamiltonian. III. Radical recombination in switched high magnetic field, S.A. Mikhailov, P.A. Purtov and A.B. Doktorov 166 (1992) 35

*Molecular interactions*
A molecular dynamics study of amorphous selenium , S. Balasubramanian, K.V. Damodaran and K.J. Rao 166 (1992) 131
High pressure study of phase transitions and intermolecular interaction in crystalline benzene, S.I. Gaidai and K.P. Meletov 166 (1992) 241
Many-body symmetry-adapted perturbation theory study of the $He\cdots F^-$ interaction, R. Moszynski, B. Jeziorski and K. Szalewicz 166 (1992) 329

*Coupling of electronic and nuclear motion*
Autodetachment spectroscopy of vibrationally excited acetaldehyde enolate anion, $CH_2CHO^-$, A.S. Mullin, K.K. Murray, C.P. Schulz, D.M. Szaflarski and W.C. Lineberger 166 (1992) 207

*Energy transfer processes*
Time-dependent study of the dynamics of the collision-induced intramultiplet mixing of $Ca(4s4p(^3P_J))$ by helium at 750 K following pulsed dye-laser generation of $Ca(4s4p(^3P_1))$, F. Beitia, F. Castaño, M.N. Sanchez Rayo and D. Husain 166 (1992) 275

*Molecular photophysical processes*
Infrared photoconversion between two forms of the $CH_3OH$:HI one-to-one complex trapped in a nitrogen matrix, N. Bakkas, A. Loutellier, S. Racine and J.P. Perchard 166 (1992) 167
A study of the absolute photoabsorption cross section and the photoionization quantum efficiency of nitrogen from the ionization threshold to 485 Å, D.A. Shaw, D.M.P. Holland, M.A. MacDonald, A. Hopkirk, M.A. Hayes and S.M. McSweeney 166 (1992) 379

*Intramolecular dynamics*
$O_2H$ isomerization: potential energy surface topography and classical dynamical study, C. Zuhrt, L. Zülicke and X. Chapuisat 166 (1992) 1
Low frequency excitations of aromatic molecules in the solid state, J. Williams and B. Frick 166 (1992) 425

*–radiationless transitions*

Inertial and inertialess vibrational modes in charge transfer: a simple model, A.M. Kuznetsov 166 (1992) 303

*Luminescence spectra, yields and lifetimes*
One-step parameter estimation of the acid–base equilibria in the ground and excited states of 2-naphthol by global compartmental analysis of the fluorescence decay surface, V. Van den Bergh, N. Boens, F.C. De Schryver, M. Ameloot, J. Gallay and A. Kowalczyk 166 (1992) 249

*Non-linear responses (including optical)*
The origin of extra resonances in saturated, fully resonant, molecular spectroscopies, R.J. Carlson 166 (1992) 177

*Multiphoton phenomena*
A study of the $S_2$ ($X\ ^3\Sigma_g^-$) molecule by multiphoton ionization spectroscopy, M. Barnes, J. Baker, J.M. Dyke and R. Richter 166 (1992) 229
Computer-simulation of the multiple-quantum dynamics of one-, two- and three-dimensional spin distributions, B.E. Scruggs and K.K. Gleason 166 (1992) 367

*Reactions (including dissociation)*
Theory of geminate recombination of radical pairs with instantaneously changing spin Hamiltonian. III. Radical recombination in switched high magnetic field, S.A. Mikhailov, P.A. Purtov and A.B. Doktorov 166 (1992) 35
The stability of static chemical spike structures in reaction–diffusion systems, R.F. Sultan 166 (1992) 51
Time-dependent study of the dynamics of the collision-induced intramultiplet mixing of $Ca(4s4p(^3P_J))$ by helium at 750 K following pulsed dye-laser generation of $Ca(4s4p(^3P_1))$, F. Beitia, F. Castaño, M.N. Sanchez Rayo and D. Husain 166 (1992) 275
The dynamics of hot F atoms in low pressure plasma etching reactors, B. Shizgal and A.S. Clarke 166 (1992) 317

*–gas phase*

Classical transition state theory for the ion-linear quadrupole capture, J. Turulski, B. Pezler and J. Niedzielski 166 (1992) 115
Quantum transition state theory of the capture of an ion by a linear quadrupole in the state of low rotational excitation, B. Pezler, J. Turulski and J. Niedzielski 166 (1992) 123

*–condensed phase*

Franck–Condon transition component distributions in chemical bond formation processes in condensed systems, C. Engler and W. Lorenz 166 (1992) 107

*Tunneling*
Franck–Condon transition component distributions in chemical bond formation processes in condensed systems, C. Engler and W. Lorenz 166 (1992) 107

*Electron transfer*
Electron transfer in tetranuclear mixed-valence iron clusters. Role of the topology on the magnetic properties, J.J. Borras-Almenar, E. Coronado, R. Georges and C.J. Gomez-Garcia 166 (1992) 139
Electrochemical generation of excited TICT states. V. Evidence of inverted Marcus region, A. Kapturkiewicz 166 (1992) 259

Inertial and inertialess vibrational modes in charge transfer: a simple model, A.M. Kuznetsov 166 (1992) 303

*Ionization (including Rydberg states)*
Accurate calculation of the electron affinities of the group-13 atoms, F. Arnau, F. Mota and J.J. Novoa 166 (1992) 77
A study of the absolute photoabsorption cross section and the photoionization quantum efficiency of nitrogen from the ionization threshold to 485 Å, D.A. Shaw, D.M.P. Holland, M.A. MacDonald, A. Hopkirk, M.A. Hayes and S.M. McSweeney 166 (1992) 379
Electronic properties of the $SF_5Cl$ molecule: a comparison with $SF_6$. I. Photoabsorption spectra near the sulphur K and chlorine K edges, C. Reynaud, S. Bodeur, J.L. Maréchal, D. Bazin, P. Millié, I. Nenner, U. Rockland and H. Baumgärtel 166 (1992) 411

*Molecular motion (including diffusive)*
Low frequency excitations of aromatic molecules in the solid state, J. Williams and B. Frick 166 (1992) 425

*Isotopic effects*
Model study of the primary H/D isotope effects on the NMR chemical shift in strong hydrogen-bonded systems, M.V. Vener 166 (1992) 311

*Structure of solids and liquids*
A molecular dynamics study of amorphous selenium , S. Balasubramanian, K.V. Damodaran and K.J. Rao 166 (1992) 131
The structure of different phases of pure $C_{70}$ crystals, M.A. Verheijen, H. Meekes, G. Meijer, P. Bennema, J.L. De Boer, S. Van Smaalen, G. Van Tendeloo, S. Amelinckx, S. Muto and J. Van Landuyt 166 (1992) 287
Application of the Yukawa potential to the auto-controlled mechanism of the ovalbumin molecule in aqueous systems, T. Matsumoto and H. Inoue 166 (1992) 299

*Phase transitions*
High pressure study of phase transitions and intermolecular interaction in crystalline benzene, S.I. Gaidai and K.P. Meletov 166 (1992) 241
The structure of different phases of pure $C_{70}$ crystals, M.A. Verheijen, H. Meekes, G. Meijer, P. Bennema, J.L. De Boer, S. Van Smaalen, G. Van Tendeloo, S. Amelinckx, S. Muto and J. Van Landuyt 166 (1992) 287
Low frequency excitations of aromatic molecules in the solid state, J. Williams and B. Frick 166 (1992) 425
